NSSA Department Software Licensing Agreement

The NSSA Department believes that all students should have access to software to meet their course needs whenever possible. With this belief though, comes responsibility to follow software company licensing requirements and guidelines. To this effect, it is vital that any student using NSSA department equipment agrees and will be bound by the following:

1) No Microsoft license keys will be removed from the PC’s for personal or other use outside of the NSSA Labs.
2) VMWare Workstation is available in all NSSA Labs, this introduces additional issues and constraints.
   a. Microsoft Product Virtual Machine images may not be removed from the PC or Server for use outside of the NSSA Labs. Linux VM’s may be removed from the lab as they are open source.
   b. No license keys may be removed from these images or from VMWare workstation for outside of lab use.
   c. Students may not create Virtual Machine images using their own Microsoft products as we become responsible for ensuring they are valid licenses.
3) No software that requires a valid license (i.e. is not open source / freeware) may be installed by a student on a PC without express permission of the instructor.
4) Software obtained through the MSDNAA is for use while you are a student at RIT, once you are no longer associated with RIT, you must remove the software from your system(s).

I agree to be bound by these rules and understand that appropriate action may be taken against me by the NSSA Department / RIT / the software developer if I violate these rules.
